

Staff Monitoring

Ever wondered what your staff is doing when you are in the field organizing your Public Relations diligences... Are you the office manager that has to walk around the employees to catch them browsing non-work related websites ? Have you ever questioned yourself how much time is lost and how to get your hands on a proof of wrongdoing ?

We are here to help !!! Using secure specialized & inexpensive technology we can record every movement every single employee does on their workstations. Among the features and data we may compile for you real-time are:

- Detailed logs of what is being typed on specific workstations or company wide.
- Screenshots taken every second reflecting what your expensive workforce is investing your time and money in.
- Remote access from the manager workstation to every employee screen without being detected.
- Remote access for you, from anywhere, worldwide, real-time to every employee screen without being detected with screenshots capabilities every second.
- Detailed work force utilization reviews regarding computer use. We want your office to be productive & improve how your resources are invested. Stay in the know. Call us today !!!
